## Soft Heat Radiator S Type

Stylish, slim-line design, die-casted aluminium alloy radiators providing a comfortable, clean, efficient, safe and silent heat with low surface temperature.

Top levels of control are built-in with a programmable, highly accurate electronic thermostat. As the room temperature nears the desired set point, power is reduced and temperature is closely monitored minimizing overshoot and temperature drift, resulting in superior comfort and operating efficiency.

The high performance heating fluid provides a rapid warm-up, evenly diffused on a large surface without drying or moving the air.

**Quick and easy to install:** pre-wired electrical connections, simple and secure wall fixing supplied with 3 metal wall brackets.

### Technical specifications

- Integral user adjustable electronic thermostat. Set via soft-touch buttons and back lit LCD display showing room or set temperature, day, time, mode, heating operation.
- Manual or automatic operation with 2 programmable weekly time periods.
- Easy to configure 7 day time programme of the following modes:
  - *Comfort: heater functions at user thermostat setting;*
  - *Eco: temperature controlled at 3,5°C below thermostat setting;*
  - *Frost protection: temperature controlled at 7°C.*
- Holiday (time absence) mode and child lock facility.
- Central control: enabled using optional multi-heater programmers through the pilot wire. Functions are: Comfort, Comfort -1°C, Comfort -2°C, Eco, Frost protection, Off.
- Programmes saved in memory in event of power failure
- Double safety devices: thermal cut-out and pressure operating control.
- 220-240V~, 50Hz, Class II. Pre-wired with 3 core cable (black core for pilot wire control).
- IP24 rated (splash-proof) for use in wet areas
- Infrared remote control (optional): user-friendly LCD display programmer to easily set and control one or more heater.

**Highly accurate  
electronic thermostat.**
